

## 9. Valid Anagram

Given two strings s and t , return true if t is an anagram of s , and false otherwise.

Example: Input: s = "anagram", t = "nagaram" Output: true

### Code

```
class Solution {
    public boolean isAnagram(String s, String t) {
        return Arrays.equals(count(s),count(t));
    }
    int[] count(String s){
        int a[]=new int[26];
        for(char c:s.toCharArray()){
            a[c-'a']++;
        }
        return a;
    }
}
```
